Notes

(1) Ye et al (2000) Engineering the Provitamin A (b-Carotene) Biosynthetic Pathway into (Carotenoid-Free) Rice Endosperm; Science, Vol 287.

Patrick Moore (on the GoldenRiceNow web site) has accused Greenpeace of "crimes against humanity" over its opposition to genetically modified GR.

http://www.allowgoldenricenow.org/crimes-against-humanity

Moore states that Greenpeace's "scientific blindness has led to the actual blindness of 8 million people, mostly children". This is a serious and unsupportable accusation that bears no relation to the facts about GR. During January Moore is holding a series of "protests" and "forums" in European cities, with the help of Klaus Ammann and others and with the support of Europabio (the trade association for biotechnology companies), the John Innes Centre and other institutions and organizations with an interest in the promotion of GMO crops and foods.

Patrick Moore's assertion that GR is "normal" apart from the insertion of two genes is a misrepresentation.
