

ILLEGAL TO GROW, SHARE TRADE OR SELL FOOD

Senator Lamar Alexander and Richard Durbin are the co sponsors of Senate Bill 510.

If accepted S510 would preclude the public's right to grow, own, trade, transport, share, feed and eat each and every food that nature makes.

S510 will:

1. It puts all US food and all US farms under Homeland Security and the Department of Defense, in the event of contamination or an ill-defined emergency.
2. It would end US sovereignty over its own food supply by insisting on compliance with the WTO, thus threatening national security.
3. It would allow the government, under Maritime Law, to define the introduction of any food into commerce (even direct sales between individuals) as smuggling into "the United States."
4. It imposes Codex Alimentarius on the US, a global system of control over food.
5. It would remove the right to clean, store and thus own seed in the US, putting control of seeds in the hands of Monsanto and other multinationals, threatening US security.
6. It includes NAIS, an animal traceability program that threatens all small farmers and ranchers raising animals.
7. It deconstructs what is left of the American economy.
8. It would allow the government to mandate antibiotics, hormones, slaughterhouse waste, pesticides and GMOs.
9. It uses food crimes as the entry into police state power and control.
